BIO

I'm Felicien, a final year Ph.D. student in the Department of Information Engineering, Computer Science, and Mathematics (DISIM) at the University of L'Aquila/Italy. I work for Intecs Solutions S.p.A's as a research assistant in the R&D department of the Innovation Technology Service lab (Pisa-Italy). I graduated from Carnegie Mellon University with a Master's degree in Electrical and Computer Engineering. My research interest includes Low-code Engineering (LCE), Software Engineering, and the Internet of Things (IoT) at the Edge/Fog/Cloud. Low-code Engineering integrates the theoretical and technical research in Low-code Development Platforms, Model-Driven Engineering, Cloud Computing, and Machine Learning to automate the development of more complex application in the domains such as system engineering, IoT, industrial automation and cyber-physical systems. My current work focuses on developing a robust domain-specific environment for developing, analysing and deployment of engineering IoT systems by employing Low-code Engineering principles.
